

The custom-fit bathroom retains its rustic charm whilst allowing for the client's wish for a luxurious feel and finish. The vanity unit was designed in collaboration with the client and handcrafted by the boon team. The unit itself and adjacent alcove shelves were made using Carrera marble, giving the bathroom a gorgeous feel, very personal to the client.

Commissioned as a holiday rental, Ellie's Barn was crafted and finished with a discerning client in mind. The structure was thoughtfully positioned on-site to maximise the stunning South Downs views, which can be enjoyed from the moment guests wake in the morning.

Ellie's Barn

Ellie's Barn is deceptively spacious with every corner cleverly divided into functional areas, ensuring the overall space flows.

With planning permission granted on a former muck heap, Ellie's Barn was built to compliment the surrounding South Downs National Park and nearby buildings. The floor plan was carefully designed in conjunction with the client; a collaborative process we always enjoy, for example, the dividing wall between the main living space and bathroom was initially filled in, but later lowered to let in the light from the rear window; a change that really opened up the interior space.
