

The Shack was placed with exceptional views of the Hampshire countryside and now offers extra accommodation to the local village pub; a charming arrangement that allows visitors to become immersed in country village life.

Generously-spaced bathroom, kitchen and living areas are thoughtfully laid out, with quartz kitchen worktops, painted panelling by Little Greene and high-end fixtures and fittings by Corston Architectural Detail.

The Shack

A charming mezzanine floor adds an exciting element. It provides space for additional guests and is perfect for children, providing ideal views of the countryside and night sky.

An 'off-the-peg' build, The Shack was an exciting creation snapped up by visitors to our workshop who were looking to acquire a structure for rental and personal use. The Shack was a build we'd wanted to create for some time and the outcome exceeded our expectations. Built on a chassis with wheels, the structure can be easily moved if needed, opening up flexibility in being relocated in the future.
